If a customer disconnects service before the end of the minimum service period, that customer is responsible for paying the regular rates for the remainder of the minimum service period. When the service is moved within the same building, to another building on the same premises, or to a different premises entirely, the period of service at each location is accumulated to calculate if the customer has met the minimum period of service obligation.

If service is terminated before the end of the minimum period of service as a result of condemnation of property, damage to property requiring the premises to be abandoned, or by the death of the customer, the customer is not obligated to pay for service for the remainder of the minimum period.

If service is switched over to a new customer at the same premises after the first month's service, the minimum period of service requirements are assigned to the new customer if the new customer agrees in writing to accept them. For facilities not taken over by the new customer, the original customer is responsible for the remaining payment for the minimum service period in accordance with the terms under which the service was originally furnished.

3.3 PAYMENT FOR SERVICES RENDERED

3.3.1 Responsibility for All Charges

Any applicant for facilities or service may be required to sign an application form requesting the Company to furnish the facilities or service in accordance with the rates, charges, rules and regulations from time to time in force and effect. The customer is responsible for all local and toll calls originating from the customer's premises and for all calls charged to the customer's line where any person answering the customer's line agrees to accept such charge.

3.3 PAYMENT FOR SERVICES RENDERED (Cont'd)

3.3.2 Applicant or Customer Deposit

a. Definition of Applicant and Customer

For purposes of this subsection, an applicant is defined as a person who applies for service for the first time or reapplies at a new or existing location after discontinuance of service. Customer is defined as someone who is currently receiving service.

- b. Residential applicants for service or existing residential Customers may be required to provide the Company a security deposit in an amount not to exceed one (1) month estimated billings plus any appropriate Non-Recurring Charges. Business applicants for service or existing business Customers may be required to provide the Company a security deposit in an amount not to exceed one and one half (1 ½) months estimated billings plus any appropriate Non-Recurring Charges. Any request for deposit will be in compliance with Commission Rules. A deposit does not relieve the Customer of the responsibility for the prompt payment of bills on presentation.

- c. Deposits held will accrue interest at the fixed rate specified by the West Virginia Public Service Commission. Interest is credited to the customer annually, until termination of the service, or until return of the deposit by the Company.

- d. Deposits will be refunded or released within thirty (30) days after disconnection of service or after twelve (12) months of service, whichever comes first, unless the Company has issued two or more terminating notices during the twelve (12) month period, or unless the Customer has not signed a Service Agreement and operates on a month-to-month basis.

- e. No amount deposited as surety for provision of telecommunications service will be applied against any amounts owed for non-telecommunications services or items.

SECTION 3 - GENERAL RULES AND REGULATIONS (Cont'd)

3.3 PAYMENT FOR SERVICES RENDERED (Cont'd)

3.3.3 Payment of Charges

Charges for facilities and service, other than usage charges, are due monthly in advance. All other charges are payable upon request of the Company. Bills are due on the due date shown on the bill and are payable at any business office of the Company, by U.S. Mail, or at any location designated by the Company. If objection is not received by the Company within three months after the bill is rendered, the items and charges appearing thereon shall be determined to be correct and binding upon the customer. A bill will not be deemed correct and binding upon the customer if the Company has records on the basis of which an objection may be considered, or if the customer has in his or her possession such Company records. If objection results in a refund to the customer, such refund will be with interest at the greater of the unadjusted customer deposit rate or the applicable late payment rate, if any, for the service classification under which the customer was billed. Interest will be paid from the date when the customer overpayment was made, adjusted for any changes in the deposit rate or late payment rate, compounded monthly, until the overpayment is refunded. Notwithstanding the foregoing, no interest will be paid by the Company on customer overpayments that are refunded within 30 days after the overpayment is received by the Company.

Upon approval of the Commission, bills may contain charges for non-telecommunications services or items. In the case of partial payments of bills rendered, such partial payments will be applied to amounts owed for telecommunications services first before being applied to amounts owed for non-telecommunications services.

Where an objection to the bill involves a superseded service order, the items and charges appearing on the bill shall be deemed to be correct and binding upon the customer if objection is not received by the Company within two months after the bill is rendered.

3.3.4 Return Check Charge

When a check which has been presented to the Company by a customer in payment for charges is returned by the bank, the customer shall be responsible for the payment of a Returned Check Charge of \$15.00.

3.3.5 Late Payment Charges

Customer bills for telephone service are due on the due date specified on the bill. A customer is in default unless payment is made on or before the due date specified on the bill. If payment is not received by the due date, a late payment charge of 1.5% per month will be applied to all amounts previously billed under this Tariff. Any applicable late payment fees will be assessed according to the terms and conditions of the Company or its billing agent and pursuant to West Virginia state law.

SECTION 3 - GENERAL RULES AND REGULATIONS (Cont'd)

3.3 PAYMENT FOR SERVICES RENDERED (Cont'd)

3.3.6 Advance Payments

To safeguard its interests, the Company may require a new Customer to make an Advance Payment before services and facilities are furnished. A Residential Customer Advance Payment will not exceed an amount equal to the Non-Recurring Charge(s) and one (1) month's charges for the service or facility. A Business Customer Advance Payment will not exceed an amount equal to the Non-Recurring Charge(s) and one and one half (1 1/2) month's charges for the service or facility. In addition, where special construction is involved, the Advance Payment may also include an amount equal to the estimated Non-Recurring Charges for the special construction and Recurring Charges (if any) for up to a one (1) month period for Residential Customers, and for up to a one and one half (1 1/2) month period for Business Customers. The Advance Payment will be credited to the Customer's initial bill.

3.3.7 Payment Plans

The Company may offer two options for payment where indicated in the Rate Schedule.

a. Fixed Monthly Rate Plan

Under this plan the Customer pays a fixed monthly rate for a specified contract term. The Customer may choose a 1, 3 or 5 year contract. During the course of the contract, fixed rates (recurring and non-recurring) are not subject to Company initiated rate changes.

Service will continue in accordance with the specified contract term. Prior to the expiration of the initial term or in any extension thereof, the Customer shall give thirty (30) days written notice to the Company of Customer's intention to discontinue service. If no such written notice is received by the Company within this thirty (30) day period, the Customer's contract term will automatically be renewed for the same period of time as the original contract term. All termination obligations applicable under the original contract term will apply to this renewed contract term.

b. Month-to-Month Plan

Under this plan the Customer elects to pay month-to-month. Month-to-month rates (recurring and non-recurring) are subject to Company initiated rate changes.

Service will continue on a month-to-month basis until such time as the Customer cancels service or until such time as the Company discontinues service in accordance with the rules as outlined in this tariff.

4.1 DEFINITIONS

The term Service Charge is defined as the non-recurring charge or charges applying to the ordering, installing, moving, changing, rearranging and furnishing of telephone service and miscellaneous and supplemental equipment and other telephone facilities. The charges are separately established as follows in order to provide a reasonable basis for an equitable recovery of the costs incurred in the required operations.

- 4.1.1 Service Order Charge - Applicable for receiving information and taking action in connection with a Customer's or applicant's request.
- 4.1.2 Premises Visit Charge - Applicable for a required trip to Customer's premises in connection with establishment of service, rearrangement of service, or installation of Company owned equipment when requested by the Customer.

- 4.1.5 Restoration Charge - Applicable for restoration of service following a temporary suspension of such service.

SECTION 4 - SERVICE CONNECTION CHARGES (Cont'd)

4.2 APPLICATIONS

4.2.1 General

Service charges are applicable to the establishment or changing of service, the assumption of service by a different Customer and the move of service from one premise to another.

Changes in locations or terminations to points outside the Customer's premises are considered new installations at the new location.

The non-recurring charge applicable for the establishment of Foreign Exchange service is the total of those non-recurring charges applicable within the local and foreign exchanges.

The combination of charges applicable for a move or change of equipment or service will not exceed the charges applicable for a new installation of that equipment or service except as specified below.

Additional work operations such as premises visits made to deliver new telephone number designations or additional service orders processed to effect multiple completion dates requested by the Customer will be charged for at the levels specified in the Rate Schedule at the end of this tariff. Other activity necessitated by requests of the Customer such as work during other than normal business hours will be charged for at levels not to exceed differential costs of labor. SECTION 6 - NETWORK SWITCHED SERVICES (Cont'd)

6.1 GENERAL

This tariff applies to local exchange telephone services furnished by Armstrong Telecommunications, Inc. in the exchanges in which Armstrong Telecommunications, Inc. has been authorized to serve under certificates of public convenience and necessity issued to it by the Public Service Commission of West Virginia. The regulations and rates contained herein are applicable to various local exchange telephone services furnished within each exchange area, and are in addition to the applicable regulations and rates specified in other parts of this tariff.

Where the provision of local exchange service may involve a carrier or carriers other than Armstrong Telecommunications, Inc., the obligation of Armstrong Telecommunications, Inc. to provide such service at local exchange rates to a particular community is contingent upon existence of an approved and effective interconnection or other agreement between the other carrier and Armstrong Telecommunications, Inc. covering the exchange of the local exchange service traffic in question. Armstrong Telecommunications, Inc. will not be required to carry such traffic at local exchange rates in the absence of such agreement. In addition, the provision of local exchange service where another carrier is involved is explicitly subject to the "Obligation of the Company" provisions of Section 3.1.1 preceding.

6.2 REGULATIONS

6.2.1 Application of Exchange Service Rates

a. Business and Residence

- 1 The determination as to whether customer service is furnished at business or residence rates is based on the character of the use, made of the service. The type of Directory Listing may, in some cases, also serve as a satisfactory basis for determining whether business or residence rates apply.
2. Where the place of business is located on the same premises as a residence and separate telephone service is not installed for the business, the telephone service installed on the premises shall ordinarily be billed at the business rate if the person operating said business is required to obtain a business registration certificate for said business on said premises; and provided that the person is not exempted from paying business registration tax. In all disputed cases, however, other external indicia will be taken into account in determining whether business or residence rates should apply.

6.2 REGULATIONS (Cont'd)

6.2.1 Application of Exchange Service Rates (Cont'd)

a. Business and Residence (Cont'd)

3. Service shall be classified and charged for as business service where the use is primarily or substantially of a business, professional, institutional or occupational nature, or where a business Directory Listing is furnished, except as provided in following paragraph.
4. Service shall be classified and charged for as residence service where the primary use of the service is of a domestic nature and where the business use, if any, is merely incidental, except that service may be furnished at residence rates in the residence of a physician, nurse, dentist or veterinary surgeon, or in a clergyman's study located in a church.
5. When it is determined that a customer to residence service is using the service in such a manner that it should be classified and charged for as business service under the preceding provisions, the Telephone Company will discontinue the service of such customer in the event the customer refuses to permit the service to be classified as business service and pay the applicable business rates.
6. Residence rates shall apply to service which is terminated in facilities or equipment of an amateur radio license, notwithstanding the fact that those facilities are not located at a residence, provided that the service is used solely for control of, and non-commercial communications through, an amateur radio communications repeater and for no purpose which would otherwise cause the service to be classified as business.

b. Trunks

Private Branch Exchange (PBX) Trunk rates apply for exchange service lines connecting the PBX common equipment and in multifunction systems where the lines are used as pooled information, dial or button access, and used in connection with direct group calling features.

7.2.3 Feature Definitions

a. Call Waiting

Call Waiting permits the Customer engaged in a call to receive a tone signal indicating a second call is waiting, and by operation of the switchhook to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switchhook.

b. Call Forwarding

Call Forwarding permits the Customer to automatically transfer all incoming calls to a telephone number at another local or toll location. The Customer activates Call Forwarding by dialing a special code followed by the telephone number of the location to which calls are to be transferred. The service may be deactivated by dialing another code. The Customer must activate and deactivate this service from the station forwarding the calls. The Customer may still make outgoing calls while Call Forwarding is active, even while a transferred call is in progress. Calls cannot be answered at the base station while Call Forwarding is active.

Call Forwarding and Select Forward (following) can be provided in combination on the same line, but may deactivate or supersede each other.

7.2 OPTIONAL CALLING SERVICES (Cont'd)

7.2.3 Feature Definitions (Cont'd)

c. Caller ID Service

Caller ID is an optional central office software-based service offering which allows a Telephone Company subscriber the ability to view the calling party's telephone number on a subscriber-provided display unit. In cases where callers have either blocked their outgoing telephone number, or placed the call through an operator, the calling party's telephone number will not be displayed. In addition, Caller ID will only work when calls originate from and terminate within central offices connected by SS7 technology.

The telephone numbers that will be displayed on a Caller ID subscriber's display unit include listed, non-listed, and non-published telephone numbers.

Caller ID subscribers also have the ability to automatically reject incoming telephone calls which have been blocked. Through Anonymous Call Rejection (part of Caller ID Service), all incoming telephone calls which have the calling party's telephone number blocked will hear a recorded announcement indicating the Caller ID subscriber will not accept calls made from blocked telephone numbers; this is a free call.

1. Service Availability

Caller ID is offered as an optional service to single party residential subscribers, single line business and multiple incoming line trunk business subscribers. Caller ID is offered on a monthly subscription basis, and is provided only where facilities permit.

2. Per-Line Blocking

Customers requesting Per-Line Blocking will prevent the display of their telephone numbers on all outgoing calls. The Per-Line Blocking feature may be deactivated at any time by Customers on a call-by-call basis through the activation of a special code. Per-Line Blocking is provided free of any recurring charge, but is a special feature which must be ordered by Customers.

2. Per-Line Blocking (Cont'd)

The Telephone Company will initially install Per-Line Blocking at no charge. Requests to remove Per-Line Blocking on Customer lines will be completed at no charge. Subsequent requests to re-install Per-Line Blocking will be completed at prevailing Telephone Company non-recurring service order rates.

Per-Line Blocking will not prevent the display of originating telephone numbers to 9-1-1 emergency service providers.

3. Per-Call Blocking

Per-Call Blocking will prevent the display of Customers' telephone numbers on outgoing calls. This feature may be utilized at any time through the activation of a special code prior to dialing an outgoing call. Per-Call Blocking is provided at no charge, and is automatically placed on all telephone lines by the Telephone Company.

Per-Call Blocking will not prevent the display of telephone numbers to 9-1-1 emergency service providers.

SECTION 7 - SUPPLEMENTAL SERVICES (Cont'd)

7.2 OPTIONAL CALLING SERVICES (Cont'd)

7.2.3 Feature Definitions (Cont'd)

d. Three-Way Calling

Three-Way Calling permits the Customer, by operation of the switchhook, to place an existing call on hold, dial the telephone number of a third party and establish a local or toll three-way conference call. The Customer may talk privately with the third party before establishing the three-way connection and may disconnect the third party to re-establish the original connection. The Customer's line establishing the conference call must remain open for the duration of the call or the connection for all callers will be terminated.

e. Speed Dialing

Speed Dialing permits the Customer to program up to eight frequently dialed numbers by dialing a one-digit code. This feature can accommodate local, toll, and long distance numbers. Customer uses a code to access the Speed Dialing feature. Customer may change list whenever necessary.

SECTION 7 -.SUPPLEMENTAL SERVICES (Cont'd)

7.2 OPTIONAL CALLING SERVICES (Cont'd)

7.2.3 Feature Definitions (Cont'd)

The following central office-based call management services forward the calling party's number to the terminating end, where facilities permit. The services work only on calls that originate from and terminate to appropriately equipped offices. These services provide a variety of subscription and usage-sensitive priced, user-programmable features that manage calls bases on Customer input directions to the network. These services are automatically available to any single line Customer connected to the appropriately equipped offices. The Customer has various billing and/or blocking options for the use of these services.

f. Repeat Call

This service allows a calling party to redial the last telephone dialed, provided it is a number in appropriately equipped offices. If that line is found busy, a 30-minute queuing process begins, and the Network automatically attempts to complete the call.

Residential customers can either pay-per-use so that a separate charge applies to each activation of this service; or subscribe to the service and incur a monthly charge for unlimited use. When the Customer pays-per-use, the usage charge applies each time the service is activated whether or not the called party answers. SECTION 7 - SUPPLEMENTAL SERVICES (Cont'd)

7.2 OPTIONAL CALLING SERVICES (Cont'd)

7.2.3 Feature Definitions (Cont'd)

h. Priority Call

This service provides one distinctive audible signal to the called Customer when receiving a call from one of up to ten (10) prespecified telephone numbers. Through a interactive dialing sequence, the Customer creates a screening list of up to ten (10) telephone numbers in the switching machines. This list can only be created from and for telephone numbers located in appropriately equipped offices. When a call arrives from one of the pre-specified telephone numbers, the Priority Call rings distinctively. If the called Customer subscribes to call waiting, and the call arrives while the line is busy, the call waiting tone has a distinctive pattern. For calls from a dial tone line with multi-line hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

i. Select Forward

This service allows the Customer to select a maximum of ten (10) telephone numbers for forwarding. The Customer activates this service by dialing a code to create a screening list via an interactive dialing sequence. This list can only be created from and for telephone numbers located in appropriately equipped offices. Only calls from those telephone numbers in the screening list may be forwarded to the designated telephone number.

For calls from a line within multi-line hunting, the call is selectively forwarded only where the main telephone number has been entered in the screening list.

Select Forward and Call Forwarding (preceding) can be provided in combination on the same line, but may deactivate or supersede each other.

SECTION 7 - SUPPLEMENTAL SERVICES (Cont'd)

7.2 OPTIONAL CALLING SERVICES (Cont'd)

7.2.3 Feature Definitions (Cont'd)

j. Call Block

This service gives the Customer the ability to prevent future calls from specific telephone numbers and can be activated after receipt of an unwanted call or after entering a telephone number from which the calling party does not wish to receive future calls. To activate the service, the Call Block customer regains dial tone and dials a code, which creates a screening list for a maximum of ten (10) numbers. This list can only be created from and for telephone numbers located in appropriately equipped offices. Further calls to the Call Block customer from telephone numbers in the screening list are connected to an announcement stating that the called party is not accepting calls and the Call Block customer's telephone does not ring.

For calls from a line within multi-line hunting, the call is blocked only where the main telephone number has been entered in the screening list.

k. Call Trace

This service allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Telephone Company. The Customer using Call Trace is required to contact the Telephone Company for further action. The Customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

The usage charge applies each time the service is activated.
